I'm just a kid and I've got asthma. But you can help me fight my attacks.
- AVO: Want to learn how you can fight childhood asthma? There are many things that you can do to prevent your child from future attacks. Don't smoke inside your house; take it outside, because second-hand smoke can trigger your child's asthma attack. Hey – it takes a lot of will power to quit smoking – but it can take a *lot less* to quit smoking in the house. Keeping your home smoke free can make a huge difference to a child with asthma because smoke can linger for a lot longer than you think.
- Children: Háálá lóó' tóbáá istin doo awááhta ádanisinda.  
Cause I don't want to feel like a fish with no water.
- AVO: To discover other simple ways to prevent an asthma attack call 1-866-NO-ATTACKS. A public service message brought to you by the EPA and the Ad Council.

Mom, Dad, Grandma, Grandpa, I know that you want to do all that you can to help me – but you might not know about all the different stuff that can make me have an asthma attack, or all the simple things you can do to fight my asthma. Please don't smoke in the house or the car because second hand smoke triggers my asthma attacks. If you put my teddy bear in the freezer it will wipe out the dust mites and if you dry off my rubber duckies and bath toys you will get rid of mold, all the things that can cause an attack.
- AVO: These are just a few of the many things that you can do to help your child fight their asthma attacks. To discover other simple ways to prevent an asthma attack call 1-866-NO-ATTACKS. A public service message brought to you by the EPA and the Ad Council.
